

Meme:

This meme is relevant to the course since it is a meme about the environment and the climate change. I creatively combined an image on the Internet with my own text to reproduce a decently funny meme. This meme is funny because it is relatable. Many people are feeling overwhelmed and anxious about climate change, and it can be hard to stay positive in the face of such a daunting challenge. However, it is important to remember that we are not alone in this fight, and that there are still things we can do to make a difference. We can all do our part to reduce our carbon footprint, and we can support organizations that are working to address climate change. By working together, we can create a more sustainable future for ourselves and for generations to come.
